Global feasibility studies

Farm for Impact program

Crop consultancy

Tailored program development

Certification program support

Technology development

Current regenerative agriculture projects

Regenerative agriculture is transforming farming by restoring soil and biodiversity. Here's a look at the key sectors we are driving to this change globally.

Farm for Impact

A regenerative program that helps companies, traders, and/or farms throughout their transition from conventional to regenerative agriculture.

01 Strategy engagement

- Align with STBi targets
- Define strategy towards goals
- Potential for digitalization

02 Farm selection

- Supply chain analysis
- Farmers' mapping
- Farmers' engagement

03 Gap analysis

- Farmers' goals
- Companies' goals
- Potential GHG reduction and carbon sequestration
- Farm diagnosis
- KPIs baseline
- Regen design and field application

04 Implementation, monitoring, reporting

- Implementation of management plan
- Plant analysis
- Integrated pest management
- Data processing and interpretation
- Progress monitoring and reporting

05 Farm for Impact Hub and TA

- Farmers' engagement and onboarding
- Farm diagnosis and evaluation
- Regen design and field application
- KPIs baseline
- Regional workshops
- Technical assistance
